MOTTO

I am an enthusiastic and detail-oriented FullStack developer with expertise in ReactJS, HTML, CSS, JavaScript, NodeJS, and NestJS. I love learning about new technologies and coding complex functions. I know software programming, REST APIs, and online application design. I have excellent teamwork skills and love to lend a hand.

SKILLS

Programming Languages:

HTML, CSS, JavaScript, TypeScript.

Frameworks / Platforms/RDBMS:

ReactJS, Redux, Redux-toolkit, Bootstrap, Ant-design. NestJS, Prisma, MySQL, MongoDB, Mongoose, Nodejs.

Foreign Languages:

English (reading).

Version Control:

Git.

Soft Skills:

Teamwork, Technical communication, Highly adaptable.

Others:

Organization and time management, Self-discipline and responsibility, willing to learn a new language or technology.

EDUCATION

August 2022 - February 2023

FRONT-END DEVELOPER

CyberSoft Academy

Learning experiences such as a 6-month internship, continual coding projects, grouping, debate, thinking analysis, and problem-solution

February 2023 - May 2023

BACK-END NODEJS DEVELOPER

CyberSoft Academy

Learning experiences such as a 3-month internship, continual coding projects, grouping, debate, thinking analysis, and problem-solution

2021 - Now

SOFTWARE TECHNOLOGY

Gia Dinh University

INTERESTS

I enjoy engaging in team-building activities, traveling with friends, reading books, and learning about contemporary technologies.

CERTIFICATIONS

2023

CYBERSOFT PROFESSIONAL FRONT-END DEVELOPER CERTIFICATE

2023

CYBERSOFT PROFESSIONAL BACK-END NODEJS DEVELOPER CERTIFICATE

PROJECTS

Project 1: Ecommerce

February 25, 2024 - Now

Team size: 1

Github:
https://github.com/PhanHunggg
/E-commerce.git

YOUR POSITION IN PROJECT

- Build commercial web services. Can sell a wide range of things, including clothes, phones, and shoes…vv.
- Build an API with an API key, access token, and refresh token, use software design patterns, decentralize permissions, and manage problems.
- Users can register, log in, add to the cart, change the amount of things in the cart, and view more items.

TECHNOLOGY DESCRIPTION

Nodejs, MongoDB, Mongoose, JWT, Bcrypt,…

Project 2 : Store phone

Late November -
Mid February 2023

Team size 1

Webservice:
https://phone-
be.onrender.com/swagger

YOUR POSITION IN PROJECT

- Build a web service for the Phone Store. Can sell a variety of phones and iPads.
- Users receive an email confirming their registration, which grants them access once verified. Unconfirmed users are reminded to confirm. Password resets result in a forgotten password email, which allows users to change their password using a link on the website.
- Secure user credentials and provide a personalized experience with a strong authentication system based on JWTs and Bcrypt.

TECHNOLOGY DESCRIPTION

Nodejs, Nestjs, Prisma, JWT, MySQL, Nodemailer, Bcrypt…

Project 3: Movie

June 2, 2023 - June 5, 2023

Team size: 1

Web
movie-tmdb-ochre.vercel.app

YOUR POSITION IN PROJECT

- Build a movie-watching website using the TMDB API.
- When you choose a movie, it will show you information about it such as the title, rating, summary, actors, Official Videos, Similar Movies, and Recommendations.
- Users can look for movies, television shows, and movie genres that they enjoy.

TECHNOLOGY DESCRIPTION

ReactJS, Redux-toolkit, SASS, JavaScript, REST APIs

Project 4 : e-learning

March 6, 2023 - March 26, 2023

Team size: 3

Web:
e-learning-app-three.vercel.app

YOUR POSITION IN PROJECT

- Leader. Build an educational site similar to Udemy.
- Build a homepage, and profile page with functions to view courses, personal information, update personal information, view registered courses

TECHNOLOGY DESCRIPTION

ReactJS, Redux-toolkit, SASS, JavaScript/TypeScript, REST APIs, Ant Design

Project 5 : Fiver clone

August 2023 - October 2023

Team size: 1

Web:
https://fiver-sever.vercel.app/

YOUR POSITION IN PROJECT

- Build a web service clone of Fiverr that includes APIs for authentication, job type, job type details, job category, work, and job hire.
- Build a full basic API that meets CRUD.
- Secure user credentials and provide a personalized experience with a strong authentication system based on JWTs and Bcrypt.

TECHNOLOGY DESCRIPTION

JavaScript/TypeScript , Prisma, MySQL, NestJS, Bcrypt,...
